### Course overview:

Key benefits of the seminar:

- Establishes a comprehensive understanding of philosophy of science
- Provides an overview of different qualitative methods for data collection and analysis

Initiates a dialogue of publishing strategies and practices

### Day 1: Investigating power: how the philosophy of social science matters

- Power relations are the essence of organization, both intra-organizationally and in inter-organizational relations. Yet, they are often not treated at all or treated superficially in Management scholarship. The seminar will:
- Demonstrate the reliance on implicit philosophies of science of much thinking and writing about power
- Critically interrogate the paradigms debate
- Demonstrate the limitations that paradigmatic assumptions and more or less implicit philosophies of science can impose when framing research investigation and doing analysis
- Cover central debates about power in the social sciences and relate them to positivist, interpretivist and realist approaches

### Day 2: How to do Qualitative Research

- Comparing qualitative and quantitative research approaches
- Different approaches to qualitative research
- Designing a research project
- Sensitive issues in qualitative research
- Thinking theoretically
- Doing a literature review
